Seasonal Maintenance....

Spring Opening, Fall closing, inspections, hot water tank flushing, filter changes, UV's & water quality testing.

YES! Harris Plumbing does all this!

**JOIN THE
MOVEMENT..
DRINK YOUR
OWN WATER!**

What can you do at the cottage to reduce plastic use???

- ◆ Install a quality Ultraviolet filtration system to kill bacteria. You CAN safely drink your tap water!
- ◆ Remove sediment, sulphur, iron, manganese, taste & odour from your water.
- ◆ We can test your water and custom-design a water filtration solution for your cottage.

Summer Cottage Plumbing Tips

Even though your cottage was closed properly, cracks can still occur. Winter freeze & thaw, unheated crawlspaces, open airways & critters can cause movement in plastic pipes. If we are opening your cottage we can repair them so you don't have to.

- ◆ Use eco-friendly soaps, shampoo + detergent. Phosphorus is extremely damaging to lakes & rivers as it promotes algae.
- ◆ Be mindful of what goes into your septic tank + it's capacity. Ask us about **BIO-CLEAN** ~ amazing for drains & tank efficiency.
- ◆ Don't park vehicles on top of your septic bed or tank.
- ◆ Conserve water! Replace old water-wasting toilets. Go dual-flush or low-flow. We can take care of that for you. Water-saver showerheads can save 25%—60%.
- ◆ Install low-flow aerators on all your faucets & showerheads.
- ◆ Consider a UV system. Safe water & no plastic bottles!

Our promise to you. . .

*We will always treat
your cottage + your property
with care + respect.*

Thank You for your business.
